

Masterclass on Sustainability

Sustainable Futures: Strategies for Achieving
Net Zero and ESG Goals

13 November 2024, Wednesday

9.00am – 5.00pm

INCEIF University Campus

Siri No.: 10001470619

HRD CLAIMABLE

This programme aims to explore the critical pathways toward achieving net zero emissions and integrating Environmental, Social, and Governance (ESG) principles into corporate strategies. Through this programme participants will engage with experts to understand transition strategies, investment requirements, and the role of carbon markets in fostering sustainable business practices. The discussions will also highlight Malaysia's unique pathway to net zero and the necessary investments for a sustainable future.

Objective

- To understand the role of transition strategies and finance in decarbonisation.
- To explore key concepts related to ESG and their impact on achieving net zero.
- To discuss Malaysia's specific challenges and opportunities in its pathway to net zero.
- To examine corporate governance frameworks that support sustainability initiatives.
- To identify actionable steps for businesses to transition from net zero ambitions to tangible actions.

Learning Outcome

1 Articulate the importance of transition finance and internal carbon pricing in decarbonisation efforts.

2 Evaluate the interplay between climate change, biodiversity, and corporate sustainability.

3 Assess Malaysia's strategies for achieving net zero and the investments required.

4 Develop a comprehensive understanding of corporate governance related to sustainability.

5 Create actionable plans for implementing net zero strategies within their organizations.

Programme Agenda

SESSION

TOPIC
